The Multi-S® - Multi Start

THE MULTI – S® SYSTEM is a pre-fixed appliance for children between 5 and 8 years old. Its unique design makes it easy for young patients to use while watching TV, doing homework, or sleeping. It provides an eruption guide for the anterior teeth, and 3 holes in the anterior section of the appliance for easy breathing.

Material: Silicone

Competition
Ortho-Tain Nite-Guide®

- Children ages 5-8 years old
- Reduces muscular forces on the teeth
- Promotes proper anterior tooth alignment
- One size fits all

Multi-Family™ Frequently Asked Questions

1. How do you clean it?

-Daily:

- o Before use rinse under running water
- o After use, wash the appliance with a toothbrush under running water (Toothpaste can be used occasionally if necessary. As toothpaste is mildly abrasive, excessive use of toothpaste may scratch the surface.)

-When needed:

- o Disinfect the appliance in boiling water
- o Wash the box in a dishwasher
- o Sterilization in autoclave at 273 F

2. How long does the patient have to wear it?

- As for fixed appliances, it is impossible to give an exact time for how long treatment will take. It is a very complex question because many factors come into play:

- o Type/severity of malocclusion
- o Skeletal growth pattern of patient
- o Patient specific individual characteristics of dental development
- o How early/late is treatment initiated
- o Clinical preferences of the clinician
- o Patient compliance
